

Shelter Products, Inc. Announces Partnership with EPA's ENERGY STAR® Program

(July 31, 2012, New Ulm, MN) Shelter Products, Inc. today announced they have joined EPA's ENERGY STAR program as an ENERGY STAR partner. Shelter Products, Inc. through its voluntary partnership with the U.S. Environmental Protection Agency's ENERGY STAR Program, will work to improve energy efficiency and fight climate change through the creation of ENERGY STAR qualified exterior entry doors.

"Shelter Products, Inc. is pleased to become an ENERGY STAR partner," said Duane Lambrecht, President. "Through this partnership, we will demonstrate our commitment to environmental stewardship and lowering energy costs by improving the energy efficiency of the products we build."

In partnership with ENERGY STAR, Shelter Products, Inc. will:

- Measure and track the energy performance of our entry door systems.
- Develop and implement a plan consistent with the ENERGY STAR Energy Management Guidelines to achieve energy savings;
- Help spread the word about the importance of energy efficiency to our staff and community;
- Support the ENERGY STAR Challenge, a national call-to-action to help improve the energy efficiency of America's commercial and industrial buildings by 10 percent or more;
- Highlight our achievements with recognition offered through ENERGY STAR.

"Improving the energy efficiency of our nation's buildings is critical to protecting our environment," said Jean Lupinacci, Chief of the ENERGY STAR Commercial & Industrial Branch. "From the boiler room to the board room, ENERGY STAR partners are leading the way by making the buildings where we work, play and learn more efficient."

ENERGY STAR was introduced by EPA in 1992 as a voluntary, market-based partnership to reduce greenhouse gas emissions through energy efficiency. Today, the ENERGY STAR label can be found on more than 60 different kinds of products as well as new homes and commercial and industrial buildings that meet strict energy-efficiency specifications set by the EPA. Over the past twenty years, American families and businesses have saved a total of nearly \$230 billion on utility bills and prevented more than 1.7 billion metric tons of greenhouse gas emissions with help from ENERGY STAR.
