

Shelter Products, Inc. joins Therma-Tru family

January 7, 2014

NEW ULM, MN- Shelter Products Inc., a locally owned wholesale distributor, has entered into a distributor/fabricator agreement with Therma-Tru Corp. Shelter Products, Inc. (SPI) will distribute the full line of Therma-Tru steel and fiberglass door, sidelite, and transom products. SPI will offer a full palette of solid color and stain pre-finish options. The company will service lumberyards and retail building centers in Minnesota and South Dakota. SPI will be ready to deliver entry door products in the Spring 2014 and beyond.

Shelter Products, Inc. prides itself on supplying the industry's highest-quality products and delivering impeccable customer service. During its 32-year history, SPI has built a thriving business that supplies extensive lines of high-quality, high-value building products to its customers.

"Our retail partners serve a very demanding clientele, consisting of homeowners that need exterior products that will stand up to severe weather without requiring extensive maintenance," said Aaron Lambrecht, President of Shelter Products, Inc. "Therma-Tru Corp. door systems meet the requirements of the market with a broad line of high-end products supported by extensive product development and research."

Shelter Products, Inc. supplies premium products to both retail building centers and the manufacturing housing industry. SPI covers Minnesota, North Dakota, South Dakota, Iowa and Wisconsin. SPI trucks service these areas bi-weekly, providing customers with extensive product lines, allowing them to carry fewer inventories. SPI's mission is to meet and exceed customer expectations, providing high-quality products, on-time delivery and competitive prices.
